

Why Not?

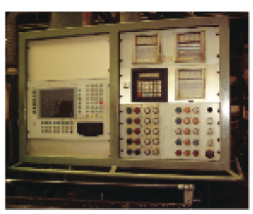

THINK ABOUT A REVAMPING SOLUTION

Give a new dress to your lines!!

With its **30 years of experience** in wire and cable manufacturing and plastic extrusion with more than **3.000 active istallation** all around the world, Elav® can offer a wide range of services dedicated to new and old lines. Our great **flexibility** gives you the opportunity to upgrade your manufacturing lines in one time or in more steps, according to your current budget. Thanks to its **consolidated know-how, Elav®** team will follow you throughout the whole development process, from design to commissioning, giving you the **tailor-made solutions** you need for your new and old lines.

Before

After

The deep knowledge of all production processes, combined with the usage of state of the art technologies, is a warranty for the best performance of your machine, cutting down power consumption and giving the **best quality** to your products.
The use of first class automation equipments, together with technologically advanced engineering and commissioning departments, cuts down the machine downtime and gives a long life to the system.
You will taste the **Elav®** strong proficiency in **after sales services**, one of our strenghts, where a team of dynamic engineers will follow you for all your needs.
